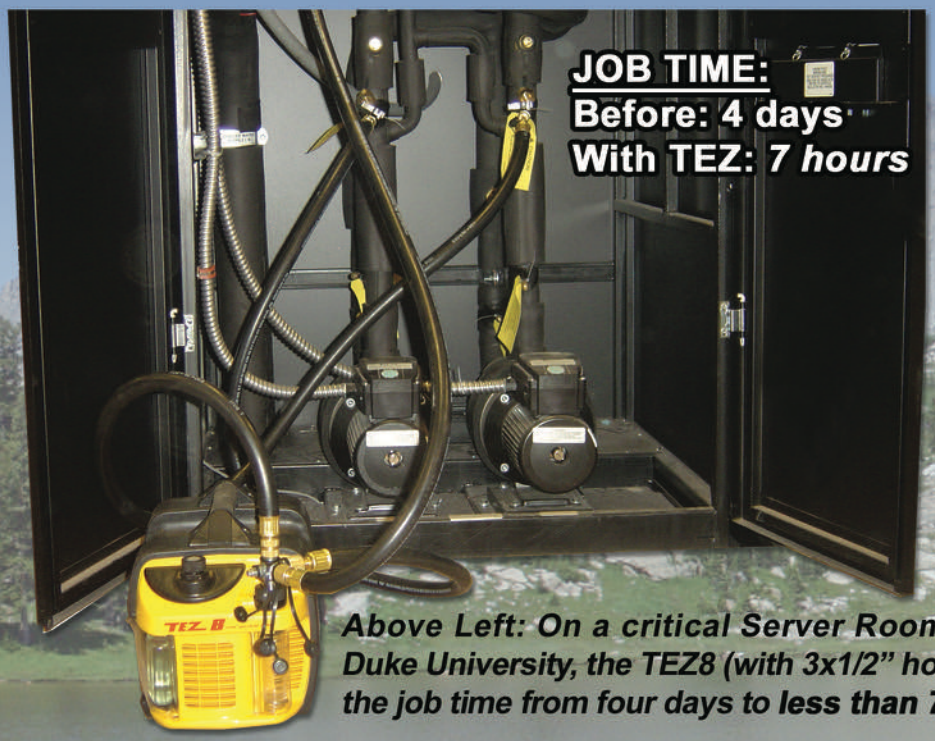
AC/R System Evacuation in 1 day o



*Above Left: On a critical Server Room job at Duke University, the TEZ8 (with 3x1/2" hoses) cut the job time from four days to **less than 7 hours.***

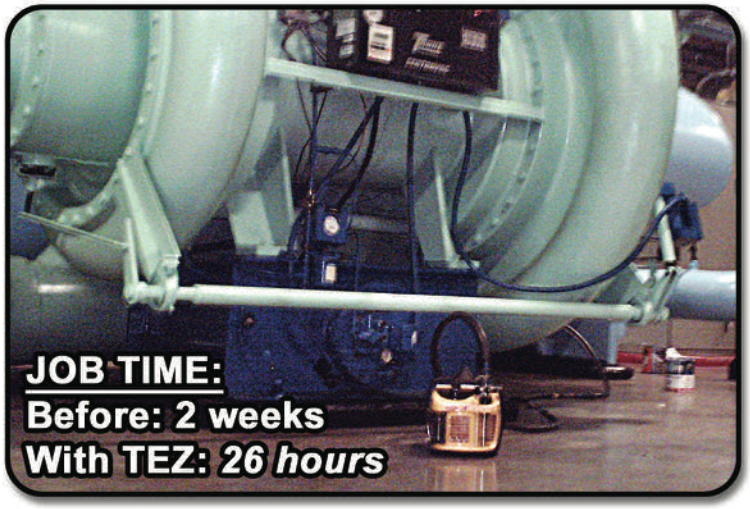
Above: This 2,000 t atmosphere to 1,000 instead of days wit

5x-10x Faster

The TEZ Speed Syste 3/8" and 1/2" connecti time savings ratio of a to 10-to-1) on resident and industrial job sites connections.

So for every 5-10 hour spend evacuating, the System can do it in 1 h

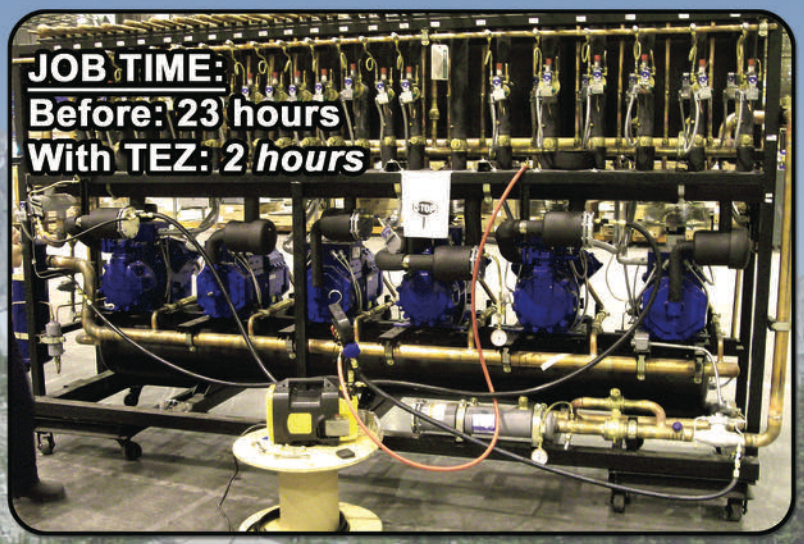
Below: Thanks to massive flow and "on-the-fly" oil changes, in just 26 hours the TEZ8 evacuated six 1500-ton chillers, one at a time, to 500 microns... outperforming a 20-cfm belt driven pump.



Save Hours, Save M

or less, with the TEZ Speed System

00 ton chiller was pulled from
,000 microns in **only 3.5 hours**,
with a belt-driven pump.



Above: With five simultaneous full-flow connections, the TEZ Speed System evacuates racks like these up to 10 times faster than typical vacuum pumps.
